Project Plan

Project Overview

This project is a simple Assignment Tracker designed for students who need an easy way to manage school tasks and deadlines. The website allows users to create, view, edit, and delete assignments in one place. It was built for Assignment 3 using Node.js, Express.js, MongoDB Atlas, Mongoose, and EJS.

The purpose of the app is to help students stay organized by keeping all of their upcoming assignments stored online with clear due dates and course information.

What the Site Does

The Assignment Tracker provides a clean and straightforward interface where students can:

- View all upcoming assignments in a table

- Add new assignments with a title, course, due date, and description

- Edit existing assignments when details change

- Delete assignments that are no longer needed

- Confirm deletion before removing anything permanently

- Navigate easily using simple "Back" buttons

- Enjoy a clear baby-blue layout that is easy to read and use

*This makes it useful for managing schoolwork and seeing all deadlines in one place.

Assignments

[Add Assignment]

Title	Course	Due Date	Completed	Actions
Assignment 5	Intro to Accounting	2025-11-25	No	[Edit] [Delete]
